

# Mt Henry: A Proven Gold System, Poised for Growth

---

## Resources Rising Stars - Sydney

10 February 2026

# Disclaimer

This presentation has been prepared by Alicanto Minerals Limited (“Alicanto” or the “Company”) and is authorised by the Board of Directors of Alicanto.

## General Information & Disclaimer

This presentation has been prepared for the purposes of providing information to the recipient regarding Alicanto. It does not, and does not purport to, contain all the information that the recipient may require to evaluate the Company. It should be read in conjunction with Alicanto’s other periodic and continuous disclosure announcements, which are available at [www.asx.com.au](http://www.asx.com.au).

No representation or warranty is given as to, and the recipient must not rely on, any information, statement or opinion contained in this presentation, or its accuracy, reasonableness or completeness. Except for statutory liability which cannot be excluded, each of Alicanto, its affiliates, directors, employees, advisers and agents expressly disclaims any responsibility for the accuracy or completeness of the material contained in this presentation and excludes all liability whatsoever for any loss or damage of any kind arising as a result of the use of, or reliance on, the information in this presentation.

This presentation does not take into account the investment objectives, financial situation or particular needs of any investor, potential investor or any other person. No investment decision should be made in reliance on this presentation. Independent financial and taxation advice should be sought before making any investment decision.

## Forward Looking Statements

This presentation may contain certain forward-looking statements and projections regarding: estimated resources and reserves; planned production and operating costs profiles; planned capital requirements; and planned strategies and corporate objectives.

Forward-looking statements are subject to a variety of known unknown risks, uncertainties and other factors that could cause actual events or results to materially differ from those reflected in the forward- looking statements, including, without limitation: inherent uncertainties and risks associated with mineral exploration; uncertainties related to the availability of future financing necessary to undertake activities on Alicanto’s properties; uncertainties related to the possible recalculation of, or reduction in Alicanto’s mineral resources; uncertainties related to the outcome of studies; uncertainties relating to fluctuations in metal prices; the risk that Alicanto’s title to its properties could be challenged; risks related to Alicanto’s ability to attract and retain qualified personnel; uncertainties related to general economic and global financial conditions; uncertainties related to the competitiveness of the industry; risk associated with Alicanto being subject to government regulation, including changes in regulation; risks associated with Alicanto being subject to environmental laws and regulations, including a change in regulation; risks associated with Alicanto’s need for governmental licenses, permits and approvals; uninsured risks and hazards; risk related to the integration of businesses and assets acquired by Alicanto; risk associated with Alicanto having no history of earnings or production revenue; risks associated with fluctuation in foreign exchange rates; risks related to default by joint venture parties (if any), contractors and agents, inherent risks associated with litigation; risk associated with potential conflicts of interest; risks related to Alicanto’s lack of a dividend history; risks relating to short term investments; and uncertainties related to fluctuations in Alicanto’s share price.

Alicanto’s forward-looking statements are based on the assumptions, beliefs, expectations and opinions of management as of the date hereof and which Alicanto believes are reasonable in the circumstances, but no assurance can be given that these expectations will prove to be correct. These assumptions include, but are not limited to, that Alicanto’s exploration of its properties and other activities will be in accordance with Alicanto’s public statements and stated goals; that there will be no material adverse change affecting Alicanto or its properties; anticipated costs and timing for Alicanto’s activities and such other assumptions as set out herein.

Such forward looking statements/projections are estimates for discussion purposes only and should not be relied upon. They are not guarantees of future performance and involve known and unknown risks, uncertainties and other factors many of which are beyond the control of the Company. The forward-looking statements/projections are inherently uncertain and may therefore differ materially from results ultimately achieved. The Company does not make any representations and provides no warranties concerning the accuracy of the forward-looking statements, and disclaims any obligation to update or revise any forward-looking statements based on new information, future events or otherwise except to the extent required by applicable laws.

## Compliance Statements

The information in this presentation that relates to the Exploration Results and Mineral Resource Estimate for the Mount Henry Gold Project is extracted from the Company’s announcement titled “Transformational acquisition of substantial WA gold project” which was released to the ASX on 17 and 19 December 2025. The Company confirms that it is not aware of any new information or data that materially effects the information in the original market announcements and, in the case of the Mineral Resource Estimate, that all material assumptions and technical parameters underpinning the estimates in the relevant market announcement continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Person’s findings are presented have not been materially modified from the original market announcement.

# Alicanto: A Large, Underexplored Western Australian Gold Project

## Mt Henry is a large, shallow Western Australian gold project with clear pathways to resource growth and standalone development

### Scale and Quality

- Large, shallow gold system in a world-class WA gold district
- ~0.9Moz Mineral Resource across three deposits
- Resource constrained within an A\$2,160/oz pit shell, with upside beyond the current footprint
- 16km mineralised trend with continuity and expansion potential

### Pathway to Standalone Development

- Brownfields site with granted tenure and existing infrastructure
- Shallow mineralisation supporting efficient growth
- Regular drilling results and staged resource updates to support value creation

### Underexplored Growth Opportunity

- ~150,000m drilled over ~30 years, shallow and deposit-focused
- Extensive untested strike and depth outside current Resources
- Clear, low-risk walk-up targets along the 16km mineralised trend

### Fully Funded, Low-Risk Growth

- Fully funded ~50,000m multi-rig drill program
- Step-out and depth drilling from known mineralisation
- Preparations well advanced to support near-term mobilisation

# Proven team with a history of creating significant value

**Ray Shorrocks**  
Non-Executive Chair

**Duncan Grieve**  
Non-Executive  
Director

**Didier Murcia AM**  
Non-Executive  
Director

**Russell Curtin**  
Non-Executive  
Director

**Steve Parsons**  
Major Shareholder  
and Consultant

**Michael Naylor**  
Major Shareholder  
and Consultant

Mining and corporate finance executive with over 30 years' experience advising resource companies on capital markets and M&A globally.

**Jeff Sansom**  
CEO

Seasoned geologist, with a strong discovery track record and extensive project generation experience across gold, lithium and base metals

**Susan Fields**  
CFO

Highly experienced legal and corporate advisor with over 35 years' experience in the resources sector, Founder and Chair of MPH Lawyers, with deep expertise in corporate governance and transactions.

**Ben Palich**  
EGM Growth

Former Ernst & Young Partner with over 30 years' experience in energy and resources with strong credentials in financial leadership, risk and governance.

Highly experienced geologist with a global reputation for mineral discovery and a strong track record in building and growing resource companies and creating shareholder value.

**Tim Sloan**  
Geology Manager

Highly experienced finance executive with a global reputation for capital markets execution, financial discipline and shareholder value creation across the resources sector.

**Madison Cramer**  
Company Secretary

Mining executive with over 15 years' experience across ASX and TSX listed companies, with deep experience in strategy, market engagement and value creation.

Former Ernst & Young Partner with over 30 years' experience in energy and resources with strong credentials in financial leadership, risk and governance.

Experienced geologist with over 30 years' experience across the global resources sector, combining deep technical and commercial expertise with senior mining finance leadership.

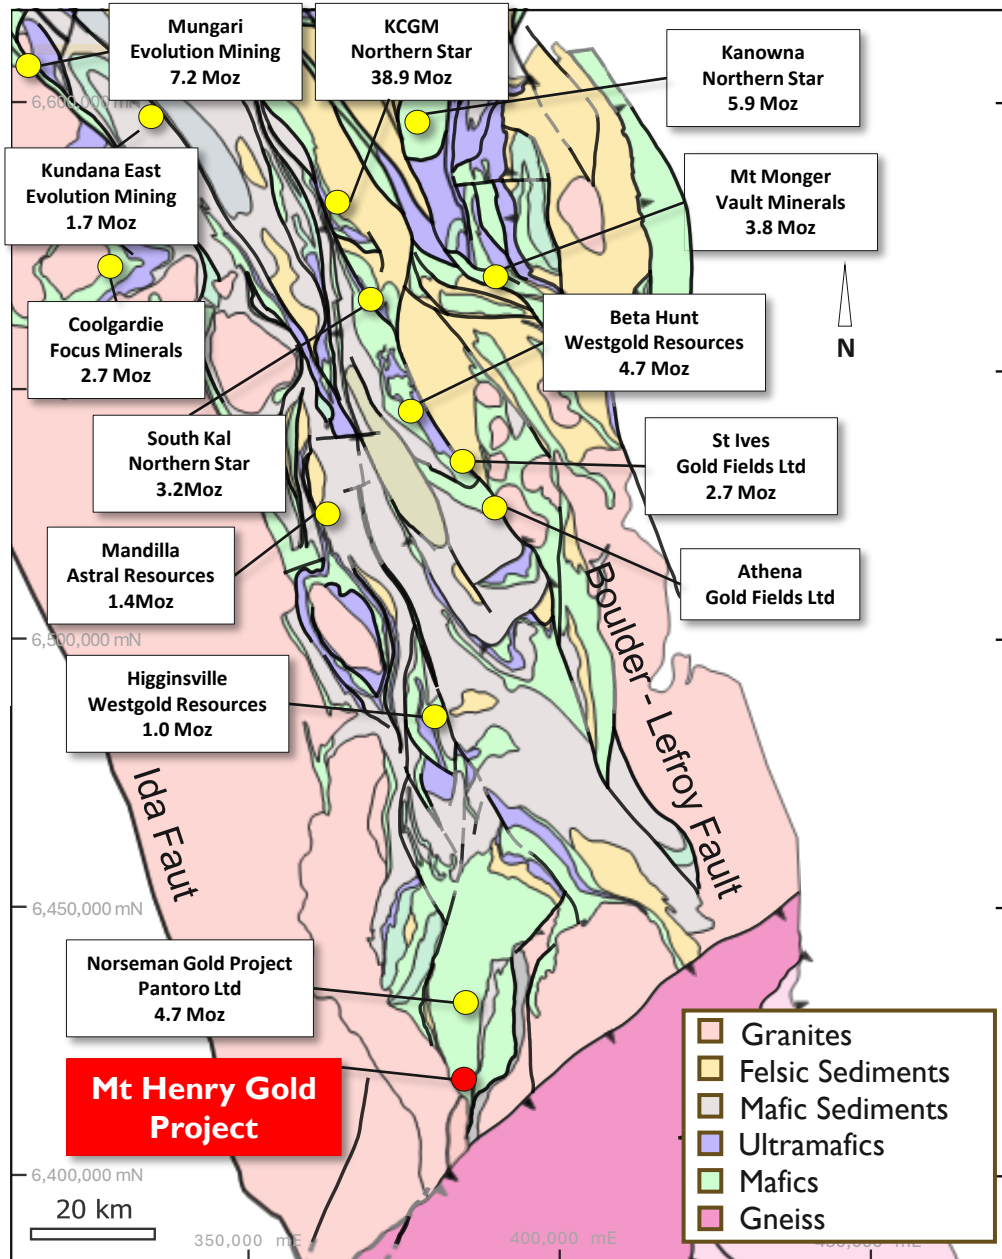

Senior Geology Manager with deep experience across ASX-listed gold and lithium operations, with strong statutory and operational leadership credentials.

A highly experienced corporate lawyer and company secretary providing corporate governance, risk management, and legal support to ASX-listed mining and resources companies.

# Mt Henry Gold Project - A District Scale Gold System

Mt Henry Deposit	Selene Deposit	North Scotia Target	16km Regional Gold Trend
2km strike length	1km strike length	400m strike length	16km strike potential
Ave drill depth ~35m	Ave drill depth ~90m	Ave drill depth ~65m	Ave drill depth ~60m
Only limited mining to maximum 90m	Has never been mined	Has never been mined	Has never been mined

# An Expandable 0.9Moz Resource in a Tier-I Gold District

**The Norseman Greenstone Belt is a highly endowed gold belt host to multiple long-life, multi-million-ounce operations**

- Mt Henry sits within a proven gold corridor hosting multiple multi-million-ounce operations, including KCGM (**ASX: NST**), Norseman (**ASX: PNR**), St Ives (**JSE: GFI**), Beta Hunt (**ASX: WGX**) and Mungari (**ASX: EVN**)
- The Project is situated in the same regional structural trend that controls gold mineralisation across the Norseman–Kalgoorlie belt
- Numerous large gold systems occur within 150 km of Mt Henry, providing regional context of the scale potential
- Alicanto controls an underexplored area of this corridor, sharing the same geological setting as neighbouring multi-million-ounce deposits.
- Project provides clear pathways to grow the current 0.9Moz resource

Source: ASX releases and Company Reports, see appendix for further detail.

# Mt Henry Acquisition - On Track and Advancing

- **Shareholder Approval Secured**  
Overwhelming shareholder approval received.
- **Transaction Progress**  
Conditions Precedent progressing as expected. Completion targeted for mid-February 2026.
- **Leadership Updates**  
Refreshed executive leadership team in place, with the capability and focus to deliver resource growth and value creation.
- **Ongoing Strategic Support**  
Steve Parsons and Mike Naylor to continue as strategic consultants, aligned with Mt Henry as their sole WA gold focus.
- **Commercial Readiness**  
Key drilling contracts tendered and progressed, ready for approval.
- **Funding Position**  
Well-funded with approximately \$15M cash.\*
- **Execution Readiness**  
Approvals, permitting and mobilisation planning well advanced to support a staged, growth-focused exploration program

\* Based on \$15.44m cash on hand at 31 December 2025. A further \$15.2 million (before costs) is expected to be received under Tranche 2 of the Placement scheduled for settlement on 12 Feb 2026.

# Alicanto Corporate Summary

## CAPITAL STRUCTURE

### PRO-FORMA<sup>1</sup>

Shares on issue	~161.9M
Share price <sup>2</sup>	A\$1.73
Market Capitalisation	~A\$280M
Performance Rights Options	~67.5M 1.25M

## SHAREHOLDER SUMMARY

### PRO-FORMA<sup>1</sup>

Institutional ownership (Global)	~29%
Westgold	~19%
Board & Management (fully diluted)	~24%
Steve Parsons and Mike Naylor	~11%

## Global Institutional Investor Base

- **High-quality and expanding institutional investor base:** Globally recognised resources investors, senior mining executives and alternative asset managers hold meaningful positions.
- **Continued momentum in the register:** The register continues to broaden as the Company executes and delivers.
- **Supportive register and reset capital structure:** Provides a strong foundation to advance Mt Henry and execute the next phase of growth.

1. Pro-forma capital structure includes the issue of shares under Tranche 2 of the Placement (refer ASX announcement 17 December 2025) and to Westgold subject to completion of acquisition of the Mt Henry Gold Project (refer ASX announcement 17 December 2025) and post-12:1 share consolidation (refer ASX announcement 16 January 2026).

2. Share price at market close 6 February 2026.

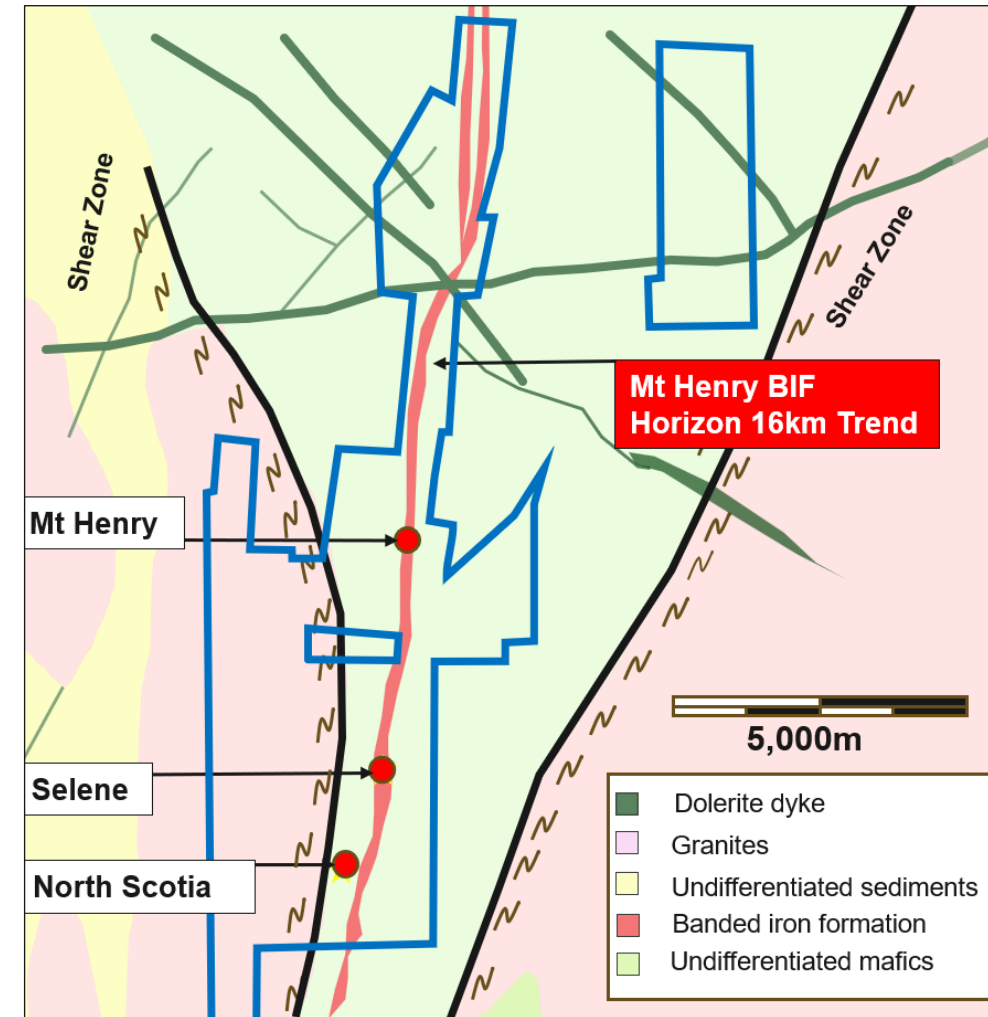

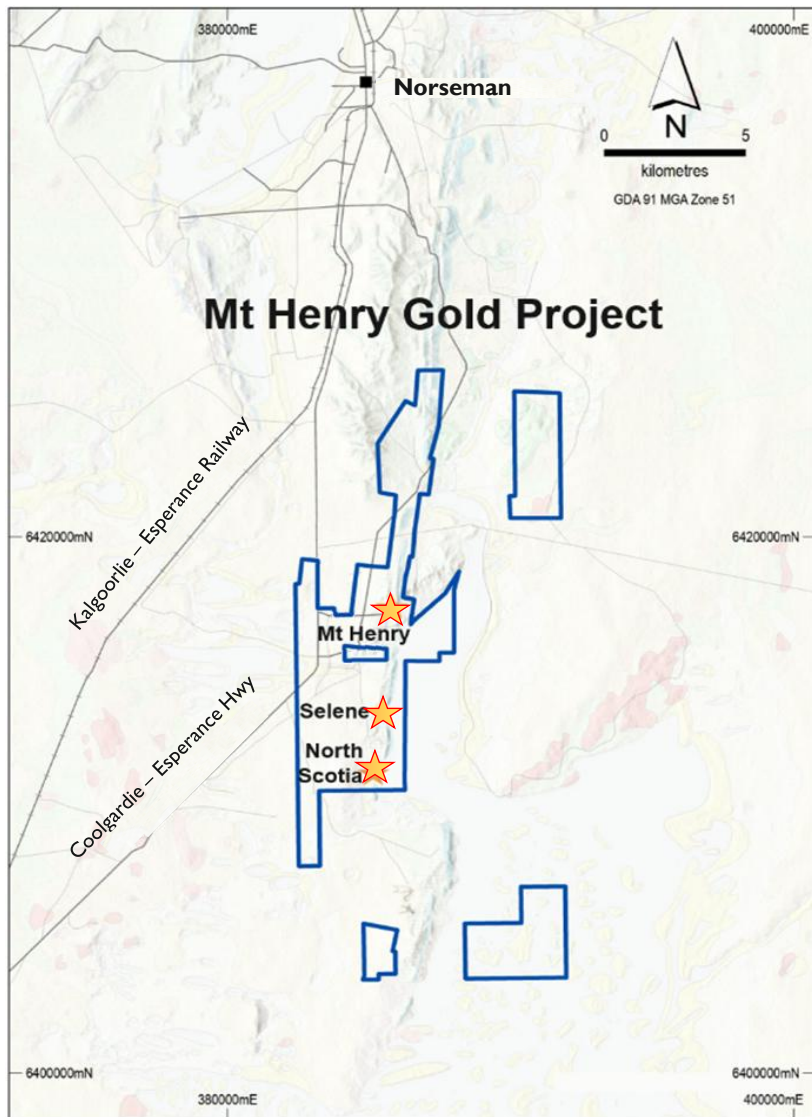

# Project Overview

# Outstanding Infrastructure, Structurally Controlled Gold

# Scratching the Surface on a Major Gold Trend

- 16km continuous gold mineralization along BIF trend with significant drill hits along the entire strike
- Historic drilling largely limited to ~150m depth with shallow pits to ~50–90m (Mt Henry only)
- Multiple deposits already defined: Mt Henry, Selene and North Scotia. Also holds 0.9Mt of stockpiles at 0.7g/t
- Large untested gaps along strike and at depth outside existing Resource areas with drilling to <50m outside the three deposit areas
- Broad, simple mineralisation supports rapid, scalable growth
- Clear, low-risk pathway to Resource expansion through step-out and depth drilling

# Selene Gold Deposit - Immediate Resource Growth

North

**Not historically mined, average drill depth of 90m**

- SIMPLE geometry with consistent mineralisation and very broad widths from surface
- Consistent over ~1,000m of strike with
- Shallow drilling depth (max depth 130m) OPEN down dip
- Significant historic drill intercepts point to immediate GROWTH

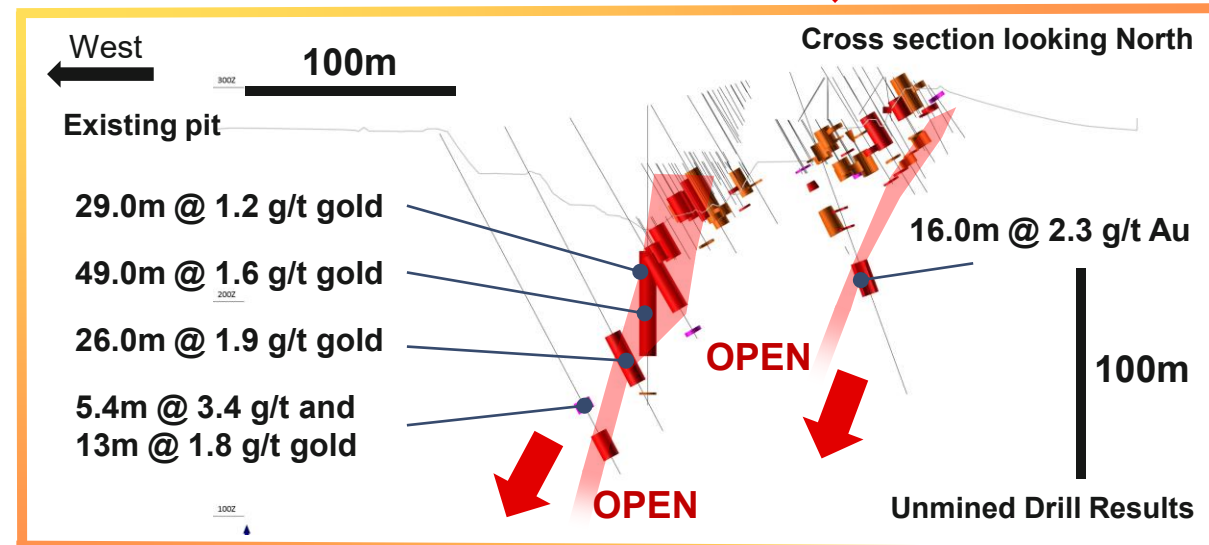

# Mt Henry Gold Deposit - Immediate Resource Growth

## Limited shallow mining **ONLY** 90m, ave. drill depth 35m

- SIMPLE geometry with consistent mineralisation and broad widths
- Strong Mineralisation over ~2km of strike
- SHALLOW drilling depth (max depth 150m)
- Completely OPEN below the shallow historic open pit
- Unmined historic drill intercepts point to immediate GROWTH

# Limited Historical Investment, Strong Gold Price Leverage

## Under-drilled through multiple cycles

- Only ~150,000m drilled in the past ~30 years. On average, ~5,000m drilled each year across the 16km gold trend
- Drilling has been shallow (to max of ~150m) and has been deposit focused, with almost no drilling outside main resource areas
- Between 2015 and 2019, selective open pit mining commenced and was completed, with no modern systematic exploration programs
- Historic work was completed at A\$2,160/oz gold
- Today's spot price of ~\$7,200/oz gold fundamentally changes the value of the project
- The underexplored nature of the project, combined with today's gold price and a modern, systematic drilling program, creates a materially different opportunity

\* Drilling metres completed excludes grade control drilling. Spot gold price is based on 9 February 2026

# Case Studies: Resource Growth via Modern Drilling

Modern drilling has consistently unlocked significant resource growth and market re-ratings in underexplored assets.

Company	Asset	Resource Growth Since Acquisition	Market Capitalisation on Completion	Current Market Capitalisation
 BELLEVUE GOLD	Bellevue Mine	3.1Moz	\$5M	~\$2.5B
Minerals 260	Bullabulling Project	2.2Moz	\$279M	~\$890M
 ROX RESOURCES	Youanmi Project	1.0Moz	\$11M	~\$790M
 GORILLA GOLD	Comet Vale Project	0.76Moz	\$18M	~\$370M
 FireFly METALS	Ming Mine	739koz Au 711kt Cu 6Moz Ag	\$153M	~\$1.6B

Note: Case studies are provided for context only and do not imply comparable outcomes for Mt Henry.

# A Large Gold System Poised for Substantial Growth

**A large, underexplored gold system, poised for growth at a time when ounces really matter.**

- **Large, underexplored gold system already proven**
  - Multiple deposits and a 16km mineralised trend highlight the scale to be tested by modern drilling
- **Decades of shallow, fragmented drilling**
  - ~150,000m drilled over ~30 years, largely <150m depth, with minimal regional or depth testing
- **First modern, systematic drill program imminent**
  - Planned ~50,000m program designed to test continuity, depth extensions and regional upside
- **At today's gold prices, ounces matter more than ever**
  - Each incremental ounce added through drilling carries materially higher value than in prior cycles
- **Execution team with a track record of re-rating WA gold assets**
  - Board, management and advisers have repeatedly delivered growth and value in similar systems
- **Disciplined approach to engagement and approvals**
  - Activities sequenced responsibly, with timing guided by engagement outcomes and regulatory readiness
